REVISION HISTORY

Version	Date	Author	Change
0.1	2026-10-25	Amish Chadha	First issue (kit 1.9.1 upgrade)

WellSling regulatory and standards register

Which standards and regulations bear on WellSling, where, and what is needed. WellSling is published as an open engineering reference, not as certified lifting or rescue equipment, and nothing here is a product claim. The bought lifting parts (winch, wire rope, shackles, chain, webbing slings and harnesses) should each be bought declared to its standard; the made parts are designed with steel-design practice and must be proof-loaded before use (TRL 4). Not legal advice; anything marked "to assess" needs a qualified reviewer, such as a competent lifting inspector, before any use on an animal. Method: STANDARDS section 23.

> **Safety:** Lifting equipment is regulated because its failure kills. Until a proof-load test at 1.5 times the hook load has been passed and recorded by a competent person, the kit is not used on an animal or near people.

Table 1. Regulatory and standards register.

#	Standard or regulation	Jurisdiction	What it covers	Applicability to this design	Owner (role)	Status
G1	EN 13157:2004+A1:2009, Cranes, safety, hand powered lifting equipment	EU (reference practice elsewhere)	Hand powered lifting equipment, including drum winches, manual chain hoists, lever hoists and pulley blocks	The hand winch (BOM line 9) in option A; the chain hoists of option B. Buy a winch declared to it or to an equivalent national standard	Design lead	To assess
G2	IS 3832:2005, Hand operated chain pulley blocks, and the draft Chain Pulley Block, Ratchet Lever Hoist and Universal Gearless Pulling and Lifting Machine (Quality Control) Order, 2025	India	Design and testing of hand chain blocks; draft order to require BIS certification	Option B only; option A has no chain block	Design lead	Does not apply to option A; applies if option B is chosen
G3	EN 1492-1, Textile slings, flat woven webbing slings made of man-made fibres	EU (reference practice elsewhere)	Webbing slings: working load limits, eyes, marking and use, including the rule that a sling wider than 75 mm bears on an essentially straight part	The two 240 mm bands (BOM line 18) and their yoke bars (line 29, STEM S33)	Design lead	Applies (buy to it); met by design for the yoke bar
G4	EN 818-2, Short link chain for lifting purposes, grade 8	EU (reference practice elsewhere)	Grade 8 lifting chain	Spread chains and adjusting chains (BOM lines 8 and 17)	Design lead	Applies (buy to it)
G5	EN 13889, Forged steel shackles for general lifting purposes	EU (reference practice elsewhere)	Dee and bow shackles	Every shackle (BOM lines 8 and 16)	Design lead	Applies (buy to it)
G6	EN 12385-4, Steel wire ropes, stranded ropes for general lifting; IS 2266, Steel wire ropes for general engineering purposes	EU; India	Wire rope construction and minimum breaking load	The 8 mm wire rope (BOM line 11)	Design lead	Applies (buy to one of them)
G7	EN 361, Full body harnesses; EN 358, Belts and lanyards for work positioning and restraint	EU (reference practice elsewhere)	Personal fall protection	Rim harnesses and lanyards (BOM line 28, PR-014)	Safety lead	Applies (buy to it)
G8	EN ISO 1461:2022, Hot dip galvanized coatings on fabricated iron and steel articles	International	Coating thickness and finish	Every made steel part (PR-015, STEM S28)	Fabricator	Met by design
G9						

#	Standard or regulation	Jurisdiction	What it covers	Applicability to this design	Owner (role)	Status
	EN 1993-1-1, Eurocode 3, design of steel structures	EU (reference practice elsewhere)	Member resistance, buckling, imperfections	Used for the leg check with an initial bow (WSL-CAL-001 C6)	Design lead	Used as the design reference
G10	The Prevention of Cruelty to Animals Act, 1960	India	Duty not to cause unnecessary pain or suffering to animals	How an animal is handled and lifted; band pressure and time in the bands (STEM S25)	Veterinary partner	To assess
G11	The Factories Act, 1948, section 29 (lifting machines, chains, ropes and lifting tackles)	India	Examination of lifting tackle in factories	A farm or village is not a factory, so it does not apply directly; its periodic examination is adopted as practice (inspect before each use, proof-load after any repair)	Safety lead	Does not apply (adopted as practice)
G12	Regulation (EU) 2023/1230 on machinery	EU	Placing machinery and lifting accessories on the EU market	Only if a kit were ever sold or supplied in the EU; the open design itself is not placed on the market	Amish (decision)	To assess (only before any supply)
G13	State and district rules on covering open wells	India (local)	Prevention: covers and parapets on open wells	Prevention is out of the kit's scope (WSL-PRB-001) but is the first answer; the partner would know the local rules	Co-design partner	To assess

Status: to assess, applies, does not apply, met by design, certification needed later.
