WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Make three. Hardwood board 600 x 300 x 50 mm, sawn square,
the grain along the 600 mm length.
Holes: two 28 mm holes straight through, on the cross centre line,
85 mm each side of the middle (170 mm apart).
Band each end with 25 x 2 mm steel strap, 40 mm in from the end,
nailed, so the board cannot split along the grain.
It lies with the 600 mm length pointing at the well, its near
end at least 650 mm back from the rim.
The foot plate sits on top, its two holes over these holes.
Check: the board lies flat on a floor without rocking.

WELLSLING github.com/BoujeeEnjinia1701/wellsling

WellSling: ground pad (make 3)
