WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Make one. Plate 300 x 300 x 10 mm.
Four 13 mm holes on a 160 mm square, its centre 30 mm off the plate's centre (check against the winch bought).
It is welded flat on the outer face of leg 1 (the face away from the well), its 300 mm length along the leg, its middle 900 mm up the leg from the foot pin centre.
Its centre sits 110 mm off the leg centre line, toward the handle side, so all four bolts and nuts clear the tube.
Two 6 mm fillet welds along the leg, both sides, full length.
Weld before the leg is galvanised.
Check: the plate is flat and square to the leg within 1 mm.

WELLSLING github.com/BoujeeEnjinia1701/wellsling

WellSling: winch bracket on leg 1 (make 1)

DRAWING NO.	REV	SHEET	SIZE
WSL-DWG-104	P1	1 of 1	ANSI B
