WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Make three. Exterior plywood 25 mm, 1,500 x 1,220 mm.
Cleats: two hardwood 45 x 45 x 1,400 mm battens glued and screwed underneath, 250 mm each side of the middle, running along the 1,500 mm length, 50 mm in from each end.
The cleats drop between the runners so the panel cannot slide sideways off the bridge.
Seal all edges; grit paint on top.
Check: the panel drops onto three runners 500 mm apart and sits flat; it weighs no more than 35 kg.

WELLSLING

github.com/BoujeeEnjinia1701/wellsling

WellSling: deck panel (make 3)

DRAWING NO.	REV	SHEET	SIZE
